HOW THE POLL WAS CONDUCTED

This poll was conducted by Mason-Dixon Polling & Strategy, Inc. of Jacksonville, Florida from January 18 through January 21, 2023. A total of 625 registered Virginia voters statewide were interviewed live by telephone.

Those interviewed were randomly selected from a phone-matched Virginia voter registration list that included both landline and cell phone numbers. Quotas were assigned to reflect voter registration by county.

The margin for error, according to standards customarily used by statisticians, is no more than ± 4 percentage points. This means that there is a 95 percent probability that the "true" figure would fall within that range if all voters were surveyed. The margin for error is higher for any subgroup, such as a gender or age grouping

QUESTION: Federal tax brackets and deductions are indexed for inflation, so that taxpayers aren't penalized as inflation moves their incomes higher. Virginia does not do this. Do you feel Virginia should or should not index state tax brackets and deductions for inflation?
